Thanks, delighted to hear that. 90/10 is a multi front battle, like cancer – we won't find one single solution other than abolition.

Hank: One of the options we have been discussing with folks on the Hill and I presented to Bob Shireman at ED yesterday is allowing schools under common ownership to have a consolidated 90/10. That would help many of our schools, though not all. Some of our smaller schools would not be helped and one or two larger schools may not be safer either. But it is one of the options we are promoting aggressively. Redacted by HELP

A suggestion was made that an organization of schools under common ownership be able to combine them for the purpose of the 90/10 calculation without going through a complete reorganization with DOE. This could help a lot of organizations greatly including ours. A backup position could be that the school group has common accreditation also. A second backup would be that the group is recognized as one entity by the accrediting organization- for instance , we are recognized as one entity by North Central , but have 6 OPEID numbers.

Has this been discussed with congressional personnel or the DOE?
