IMPACT OF POTENTIAL THREATS TO TITLE X IN NEW JERSEY

If Planned Parenthood were excluded from Title X, all other types of Title X-funded sites in New Jersey would have to increase their contraceptive client caseloads by **254 percent** to serve the women who currently obtain contraceptive care from Planned Parenthood health centers, as illustrated below.

If all Title X funds were redirected only to federally qualified health center sites that serve at least 10 contraceptive clients a year in New Jersey, those sites would have to **nearly triple their contraceptive client caseloads** to maintain the current reach of Title X.
